

## JetZero Names Dario Antonioni Executive Creative Director

### Will Lead Design and Development of New Long Beach Campus

**Long Beach, CA – March 13, 2025** / JetZero, a pioneering startup in the commercial aviation industry, announces the appointment of Dario Antonioni as Executive Creative Director. With more than 20 years of transformative design and architecture experience, Antonioni will lead the design and strategic development of JetZero's new 285,000 sqft, seven-building campus, located adjacent to the Long Beach Airport terminal. This state-of-the-art campus will serve as the company's headquarters and a hub for innovation in commercial aviation design and manufacturing.

Antonioni's visionary leadership will shape a facility that reflects JetZero's mission to reshape the future of commercial aviation. The campus will feature cutting-edge design tailored to foster collaboration, innovation, and sustainability. As JetZero redefines aircraft development, the Long Beach campus will symbolize the company's commitment to excellence in technology and design.

Dario Antonioni brings a wealth of expertise in experiential design, culture-driven architecture, and product development to his new role. As Founder of Orange22 Design Lab, Antonioni's award-winning multidisciplinary design studio has created innovative spaces and products that have transformed industries. Antonioni's designs have been published worldwide and have earned numerous prestigious awards, including honors from Cooper Hewitt, IDSA, IDEA, Spark, and Red Dot. These accolades underscore his global impact and commitment to design excellence.

Antonioni's comprehensive experience in designing for aviation, architecture, and customer-focused industries uniquely positions him to lead JetZero's campus development. His ability to align brand strategy with physical spaces will ensure that the new Long Beach campus serves as both a functional facility and an inspiring symbol of JetZero's groundbreaking work in commercial aircraft.

"Dario Antonioni's leadership and design expertise will be instrumental in crafting a headquarters that embodies JetZero's innovative spirit," said Scott Savian, Chief Product Officer, JetZero. "As we build the future of aviation, Dario's vision will help establish an environment that inspires our team and welcomes the world to experience the cutting edge of commercial aircraft design."

### About JetZero

JetZero, co-founded by aerospace legend Mark Page, is developing the world's first commercial blended wing airplane. With up to 50% lower fuel burn and carbon emissions compared to existing commercial airliners, JetZero's blended wing offers the aviation industry a clear path to achieving its 2050 net-zero goals. Working alongside the US Air Force, NASA, and the FAA, and backed by decades of investment and research into blended wing technology, JetZero looks to enter commercial service in 2030.
